

DGCA Proposes Breath Analyser Test for Air Traffic Controllers, Others

CIL to Invest in Conveyor Belts

Our Bureau
New Delhi: Air traffic controllers and personnel performing aircraft maintenance, airport and ground handling operations may now be required to undergo breath analyser test before they reach their place of work, according to a

draft proposal by the Directorate General of Civil Aviation (DGCA). DGCA chief Arun Kumar has mooted the proposal to expand the scope of aviation personnel for BA tests to enhance safety.
 "Organisations engaged in the provision of air traffic control services, aerodrome management, aircraft maintenance and repair, ground handling, aircraft operation. These include air traffic controllers (ATCOs), flight dispatchers, fire and rescue personnel, vehicle drivers, ground equipment operators," he adds a draft proposal by the DGCA.
 The regulator has proposed that "organisations engaged in the provision of air navigation services, aerodrome management, aircraft maintenance and repair, shall ensure that at least 10% of their total employ- in their respective organisations as engaged in such functions are randomly subjected to BA examination on daily basis". The DGCA wants "all employees have an equal chance of being tested each time the selections are made".

While licensed personnel like ATCOs will have their licence suspended for three months and be grounded for this period for failing the BA test first time or refusing to undergo the test, for non-licensed personnel like ground handling staff, the action to be taken will be decided by the service provider, according to the draft.

Kolkata: Coal India (CIL) and its large pilehead consumers are planning a ₹100-crore investment in conveyor belts to transport coal directly from mines in a cheaper and cleaner way without using trucks. Customers will make the investment while CIL will provide land and facilities for the belts, which will be installed in mi-

nes that produce 4 million tonnes of ore, a senior company executive said in a condition of anonymity. This will reduce the number of trucks and reduce diesel consumption and emissions, besides reducing accidents and increasing the turnaround time for coal supply as conveyors can function throughout the day. — Our Bureau
